

Goals of GSIC for CAMWS Graduate Students

The Graduate Student Issues Committee of CAMWS has previously had the goal of providing programming and spaces for graduate students to meet during annual CAMWS meetings. In a pandemic world, the needs of graduate students have evolved, particularly as relates to teaching, research, service, and planning for the future. This round-table aims to hear from graduate students (and undergraduates) about what GSIC can provide at and outside of annual meetings. It also intends to serve as an opportunity to revive a recently defunct committee and introduce interested graduate students to opportunities to be a part of GSIC.
